

Nancy Min is the Founder and CEO of ecoLong. She leads the development of blockchain based solutions for interconnected and resilient communities. As an advocate of blockchain technology, she serves as the Chair of Hyperledger Social Impact Special Interest Group (SI-SIG), hosted by the Linux Foundation. In this role, she works with the open-source community to identify high-impact blockchain use cases that drive social good. She previously worked at Deloitte Consulting as a Technology Consultant exploring and developing technologies for the federal, state, and private sectors. She received her Bachelors and Masters from Rensselaer Polytechnic Institute.
